Accessibility Report — Zienswijzer (WCAG 2.2 Level AA)

Date: 2026-06-05 **Standard:** WCAG 2.2, Level AA. **Method:** Automated checks (axe-core / Lighthouse) against the running frontend, plus manual keyboard and contrast review.

1. Scope

The Zienswijzer React frontend (served at `/`): login, case list, case overview, document detail, stakeholder views.

2. Summary of conformance

Principle	Status	Notes
Perceivable	Partially verified	Colour contrast and text alternatives reviewed on core screens.
Operable	Partially verified	Keyboard navigation across primary flows.
Understandable	Partially verified	Consistent navigation, labelled form fields.
Robust	Partially verified	Semantic HTML; ARIA where needed.

3. Automated scan

Run axe-core/Lighthouse against the running app (see SUBMISSION.md) and paste the score and any violations here before submission. Target: no critical violations.

4. Known items / remediation

- Document any contrast or focus-order issues found during the scan and the plan to address them.

5. Statement

Zienswijzer targets WCAG 2.2 AA. This report should be refreshed with the latest automated scan output against the deployed build prior to each submission.
